DEEPENDRA SINGH

Senior Software Engineer | Node.js • Nest.js • React.js • MongoDB

Gurugram, India | +91-8239634336 | deependrasingh642@gmail.com

linkedin.com/in/deependra-singh-95a444141 | **Portfolio:** deependra952118.github.io/Portfolio

PROFESSIONAL SUMMARY

Senior Software Engineer with **6 years of experience in product-based companies**, designing and delivering scalable, production-grade backend and full-stack platforms across **HRMS, FinTech and Data Enrichment**. Deep expertise in **Node.js, Nest.js, TypeScript and React.js** with **MongoDB, MySQL and Elasticsearch**. Strong in **system design** – API architecture, queue-based async processing, configurable role-based workflows and third-party integrations – with hands-on **Generative AI (OpenAI API, RAG, LLM automation)**, **CI/CD (Jenkins)** and AI-assisted development with **Cursor and Claude**. Owns features end-to-end in Agile teams.

TECHNICAL SKILLS

Languages & Frameworks: Node.js (Express.js), **Nest.js**, **TypeScript**, JavaScript (ES6+), **React.js**

Databases & Messaging: MongoDB, **MySQL** (Stored Procedures), **Elasticsearch**, **Redis**, **RabbitMQ**, **BullMQ** (Message Queues)

System Design & Architecture: REST API Design, Microservices Fundamentals, Scalable Backend Design, Role-Based Access Control, Message Queues (RabbitMQ, BullMQ), Database Schema Design

API Development: RESTful APIs, Swagger/OpenAPI, JWT Authentication, Payment Gateway & Third-Party API Integration

AI & Automation: Generative AI, **OpenAI API**, **RAG** (Retrieval-Augmented Generation), Prompt Engineering, LLM-based Automation, Web Scraping, Data Pipelines, APIFY, Semrush API

AI-Assisted Development: Cursor, **Claude** (AI pair-programming, code generation, refactoring and test creation)

DevOps, Cloud & Testing: Jenkins, CI/CD Pipelines, Docker, Git, AWS (EC2, S3), Jest, Unit Testing, Agile/Scrum, Code Reviews, Performance Optimization

PROFESSIONAL EXPERIENCE

Software Development Engineer 2 | **PeopleStrong** — **09/2024 – Present**

Gurugram, India • HRMS / Performance Management Platform (PMS)

- Designed and built the **Periodic Review** capability in the PMS, enabling **BU Heads** to independently create and launch periodic reviews for their own groups, with **task delegation** and **Custom L1/L2 reviewer setup**.
- Built a **Multi-Stakeholder Feedback Review** module to collect and consolidate feedback from multiple reviewer groups.
- Developed the **Question Bank Admin Dashboard** and **Talent Admin Dashboard** as configurable, role-based modules.
- Designed **REST APIs** for system-generated **email template management** with multi-language support.
- Implemented asynchronous job queues using **RabbitMQ** and **BullMQ** for reliable background processing.
- Delivered a **Goal Library** upload feature with APIs to store goals and milestones, plus a reminder email for L1 managers' pending approvals.

Tech Stack: Node.js, Nest.js, TypeScript, MongoDB, RabbitMQ, BullMQ, REST APIs, Jenkins, Cursor, Claude

Software Engineer | **BuzzBoard** — **12/2022 – 09/2024**

Hyderabad, India • Data Enrichment / AI Products

- Built **data-enrichment APIs** with **web scraping** pipelines for Instagram, Facebook, YouTube, Yelp, ZoomInfo, Cortera and more.
- Developed **AI-driven APIs** using the **OpenAI API** and **Semrush API**, including a keyword generation system for GoDaddy Care that eliminated significant manual effort.
- Created an Instagram data API using **APIFY**, storing profiles and posts in **MongoDB**, with Excel-report scripts.
- Wrote data migration scripts from **MongoDB to Elasticsearch** and between collections; ran monthly data-refresh projects.

Tech Stack: Node.js, MongoDB, Elasticsearch, OpenAI API, Semrush API, APIFY, REST APIs

Software Engineer | **Faircent** — **01/2021 – 12/2022**

Gurugram, India • FinTech / Peer-to-Peer Lending

- Developed server-side components and **MySQL stored procedures** for a peer-to-peer lending platform; implemented **JWT authentication** middleware with login, authentication and registration APIs for the Faircent Double app.
- Integrated third-party APIs – **Karza** (PAN verification, penny drop), **Digitap** (PAN/Aadhaar OCR, face match) – and payment gateways (**Paytm Wallet, Cashfree Wallet**).
- Built BPI and EMI calculator APIs, Investment API (Quarterly Move Fund, Freedom Plan) and MIP (Monthly Income Plan for 24 and 36 months); documented all APIs in **Swagger**.

Tech Stack: Node.js, Express.js, MySQL, JWT, Swagger, Payment Gateway APIs

KEY ACHIEVEMENTS

- **Sparkle Award, BuzzBoard** – recognized for the AI-driven keyword generation system built for GoDaddy Care (View post)

PROJECTS

ExpenseTracker – Web app to track money inflow and outflow (deependra952118.github.io/tracker) — **03/2021 – 04/2021**

EDUCATION & CERTIFICATIONS

B.Tech (Honors), Electronics & Communication Engineering | Arya College of Engineering & I.T. — **2016 – 2020**

SQL (Basic) | HackerRank (View certificate) — **11/2021**
